Lake Keowee Fishing Report

Posted by: Jay Posted date: April 23, 2012 Tagged With: | comment : 0

Lake Keowee is at 95% of full pool.

Largemouth and Spotted Bass: Fair. Guide Brad Fowler (864-934-5813) reports that there was a strong topwater pattern fishing surface lures off long, gently sloping rock or clay points, but the recent cold snaps have slowed that bite. The best pattern is now fishing shakey head worms in the same places as well as around shallow humps and rock outcroppings. While many fish have already spawned, Brad expects a substantial number of fish to spawn on the upcoming May full moon – particularly on the cooler northern end of the lake. TheLakeKeowee spawn traditionally lasts longer than on other local lakes.
