# World of Energy to host outdoor event on Saturday

THE JOURNAL STAFF

SENECA — What happens when you combine hunting, fishing, fun and family?

Duke Energy's World of Energy will host an Outdoor Family Adventure to celebrate National Hunting and Fishing Day on Saturday from 9 a.m. to 3 p.m. at the World of Energy.

The event provides a free opportunity for all ages to safely learn about recreational opportunities available in the Upstate.

Through interactive activities, visitors have the unique chance to experience many different outdoor options all in one day.

"Upstate National Hunting and Fishing Day is a wonderful event for families to enjoy together in a beautiful outdoor setting at the World of Energy," said Greg Lucas of the South Carolina Department of Natural Resources. "There is truly an activity for everyone to enjoy, and it is also a good venue to learn about conservation from many local groups and agencies attending."

Activities available include kayaking, archery and air rifle shooting, playing hide-and-seek camouflage games, fishing a well-stocked cove, playing a fishing simulator and learning more about boating and hunting safety.

Experts will be available to teach fly tying and casting and show visitors a variety of wildlife critters.

"There is nothing more fulfilling than seeing a child's excitement over catching their first fish or watching them climb into a kayak to paddle around the lake," said Angela Viney of Upstate Forever. "This celebration is an opportunity to introduce the outdoors to our children and spark a lifetime interest in a sport that will ignite a passion for conservation."

Guests may bring a picnic lunch, or purchase food from an onsite concessionaire. A free parking shuttle will be available from the Oconee Nuclear Station parking area off of Hwy 130.

For more information call the World of Energy at 1-800-777-1004 or visit www.duke-energy.com/worldofenergy

Duke Energy Carolinas owns nuclear, coal-fired, natural gas and hydroelectric generation. That diverse fuel mix provides approximately 19,000 megawatts of owned electric capacity to approximately 2.4 million customers in a 24,000-square-mile service area of North Carolina and South Carolina.
