

SPECIAL TO THE JOURNAL

Duke Energy to move transformers this week

THE JOURNAL STAFF

WEST UNION — Duke Energy will begin moving two 300,000-pound transformers from West Union to Bad Creek Hydro Station on Lake Jocassee on Thursday.

Though pull-off locations along the 20-mile route have been identified, traffic delays are expected along S.C. Highway 11 and Jocassee Lake Road. Driv-

ers are encouraged to use alternate routes during the moves.

The two moves could each take two days, depending on weather conditions, according to information from Duke Energy. The second move is set to begin Monday.

Local law enforcement will accompany the caravan, which will move at speeds of around 2-15 mph.
